Why integrate?

Motionsoft gym management software is a cloud-based solution comprised of 28 software applications to meet the needs of a wide range of membership-based businesses. The Motionsoft solution allows members to purchase gift cards, with the value of those cards being managed by the Motionsoft platform. When integrated with Book4Time, users can balance check and redeem gift cards that exist in the Motionsoft platform directly from Book4Time.

Key features

⊘ Centrally store gift card balances in the Motionsoft system

⊘ Balance check, redeem, and refund gift cards directly within Book4Time.

The challenge:

When a member wants to check their gift card balance or redeem a gift card, they expect the transaction to be fast and efficient.

⊘ Members can lose patience if you have to use multiple systems to look up and process a gift card, resulting in lost revenue and unsatisfied customers.

The solution:

By integrating Book4Time with Motionsoft, you can check a member's gift card balance and redeem their gift card at point-of-sale, providing a seamless experience for members.

The result:

⊘ Easily check gift card balances and process gift cards for services and products at point-of-sale.
